Senior Full-Stack Software Engineer with **10 years** building and shipping production systems — APIs, web UIs, cloud infrastructure, and high-load backends. Experience across fintech, ed-tech, automotive diagnostics, and developer tooling. Comfortable owning features end-to-end: design, implementation, testing, and deploy. Applied Mathematics background; technical writing on guseyn.com. Use LLM tools as a research aid when useful — not as a substitute for engineering judgment.

WORK EXPERIENCE

InstruxMusic — Senior Full-Stack Developer, Tech Lead

Nov 2024 – Present · Remote · USA

- Architected and accelerated the launch of a complex ed-tech ecosystem, delivering a production-ready MVP in under 3 months using a streamlined stack of PostgreSQL, Docker, and DigitalOcean.
- Engineered a scalable multi-tenant scheduling engine and automated invoicing system, integrating Stripe Payments to establish seamless transactional workflows and eliminate manual billing overhead.
- Developed a proprietary, low-latency video conferencing solution from scratch using vanilla Web Components and Xirsys (STUN/TURN), bypassing heavy third-party framework dependencies to achieve highly efficient real-time streaming, chat, and data channel communication.
- Designed high-deliverability notification pipelines by implementing Postmark, significantly cutting down user communication friction through automated transactional workflows.
- Own technical delivery end-to-end — architecture choices, implementation, and performance — keeping the stack lean while shipping reliably under tight timelines.
