Senior Java Engineer with deep experience in **distributed systems, fintech, and AI-enabled backends**. **10 years** building high-throughput microservices on **Java (Spring Boot)**, with hands-on work on LLM middleware, streaming analytics, and serverless AI pipelines. Oracle Certified Java SE 8 Programmer. Author of [Mathematics of Neural Networks](#), [nodes.js](#), and [EHTML](#).

Skills

- **Java & JVM Ecosystem:** Java (SE/EE, 8–21), Spring Boot, Spring Cloud, Spring Security, Spring Data, Hibernate/JPA, JDBC, Multithreading & Concurrency, gRPC, JUnit, Testcontainers.
 - **AI & Intelligent Backends:** LLM middleware, AI data tiers (DynamoDB, S3, ClickHouse), streaming inference pipelines, Python (FastAPI) for ML services, n8n workflow automation, AI-assisted development (Cursor, Copilot, Claude Code).
 - **Distributed Systems:** Microservices, Event-Driven Architecture (EDA), Apache Kafka, RabbitMQ, AWS SQS, multi-tenant SaaS, high-load financial systems, database isolation & locking strategies.
 - **Data Engineering:** PostgreSQL, MySQL, Redis, ClickHouse (OLAP), Snowflake, DynamoDB, Elasticsearch, query & index optimization, zero-loss async messaging.
 - **Cloud & DevOps:** AWS (Lambda, ECS, S3, RDS, CloudWatch, SQS), GCP, Docker, Kubernetes, Terraform, GitLab CI/CD, Artifactory, GitHub Actions.
 - **Observability:** OpenTelemetry, Prometheus, Grafana, New Relic, Graylog, Datadog, distributed tracing.
 - **Polyglot Integration:** Node.js (NestJS), TypeScript, REST/GraphQL APIs — comfortable owning Java services inside mixed-runtime environments.
-

Work Experience

InstruxMusic (Remote, USA) — Senior Full-Stack Developer, Tech Lead. Nov 2024
— *Present*

- Architected backend services for a high-load ed-tech platform (Node.js, PostgreSQL), applying Java-grade concurrency and data-consistency patterns to scheduling, billing, and real-time video infrastructure.
- Delivered production MVP in under 3 months; use AI tooling (Cursor, Claude Code) to accelerate Java/TypeScript cross-stack development and code review.

- Built thread-safe transactional workflows for multi-tenant scheduling and Stripe-integrated invoicing.

[View Recommendations](#)

Congrify (Remote, Germany/Italy) — Full Stack Senior Software Engineer, Tech Lead. *Oct 2023 – Oct 2024*

- Built a production **AI middleware layer** with DynamoDB and S3 for real-time streaming analytics and intelligent user insights in a payment intelligence platform.
- Optimized **Java**, Python, and Node.js AWS Lambda runtimes — 20% cost reduction via memory tuning, concurrency fixes, and improved data-processing logic.
- Modernized legacy Java microservices: improved thread concurrency, query execution, and stability; migrated analytical workloads to ClickHouse and Snowflake.
- Architected anomaly-detection observability with Grafana and CloudWatch for payment transaction monitoring.
- Enhanced async pipelines via AWS SQS and Pub/Sub, ensuring zero-loss reliability under heavy transactional load.

FxPro (On-site, Limassol, Cyprus) — Senior Software Engineer (Java & Node.js). *Nov 2022 – Oct 2023*

- Orchestrated infrastructure for **60+ microservices** using **Java (Spring Boot)** and Node.js (NestJS) — 20% reliability gain, 15% downtime reduction.
- Built centralized Authentication Service with Azure AD (OAuth2/OIDC); migrated payment configurations for 20+ systems across 50+ countries.
- Optimized Redis caching and PostgreSQL transactional models for high-throughput financial data flows.
- Streamlined GitLab CI/CD and Artifactory pipelines — 25% faster deployments with blue-green rollouts.
- Rolled out observability (New Relic, Graylog, Grafana) across 25+ services; authored internal docs for 40+ services.

[View Recommendations](#)

Cognitran (On-site, Krakow, Poland) — Senior Java Software Engineer. *Mar 2021 – Oct 2022*

- Developed mission-critical **Java applications** for offline-first automotive diagnostics and multi-threaded data translation pipelines for Ford and Jaguar Land Rover.

Huawei (On-site, Moscow, Russia) — Senior Software Engineer. *Jan 2020 – Mar 2021*

- Automated API migration and bug fixing across 50+ **Java codebases**; authored open-source tools including [Broken XML](#) and [Rewrite Java Definitions](#).

Grid Dynamics — Intern to Senior Software Engineer (Java / Cloud). *Dec 2015 – Jan 2019*

- Progressed from Intern to Senior Engineer, delivering **Java-based cloud-native** microservices and R&D tooling for Google, Raymond James, and Home Depot.
-

Certifications:

[Oracle Certified Associate, Java SE 8 Programmer](#)

Open Source Projects:

[Mathematics of Neural Networks](#), [Broken XML](#), [Rewrite Java Definitions](#), [Nodes.js](#), [EHTML](#)

Education

Applied Mathematics and Computer Science: *Saratov State University, 2012 - 2016*

[Bachelor's Thesis: Cost Minimization of Energy on the Control of Satellite's Angular Motion \(in Russian\)](#)
