Technical Lead and **Senior Full-Stack Engineer** with **10 years** leading architecture, delivery, and cross-functional alignment in fintech, ed-tech, and enterprise SaaS. I set technical direction, unblock teams, and still ship — from 60+ microservice estates to solo-built platforms. Business partner and tech leader at [InstruxMusic](#); founder of [Unison](#). Author of [nodes.js](#) and [EHTML](#).

Leadership & Technical Strengths

- **Technical Leadership:** Architecture reviews, roadmap ownership, build-vs-buy decisions, tech debt prioritization, incident response, cross-team alignment (product, business, ops).
 - **Team & Delivery:** Mentoring engineers, documentation standards, CI/CD culture, runbooks and internal tutorials (40+ services at FxPro), stakeholder communication, remote-first collaboration.
 - **System Architecture:** Distributed systems, microservices, EDA, multi-tenant SaaS, scalability, high availability, observability-first design.
 - **Full-Stack Execution:** Node.js, Java (Spring Boot), TypeScript, React, Next.js, PostgreSQL, Redis, Kafka, AWS/GCP, Docker, Kubernetes, Terraform.
 - **Domain Expertise:** Fintech (payments, banking, trading), Ed-tech, Developer Tools, Automotive Diagnostics.
 - **Business Alignment:** Pricing strategy, MVP scoping, cost optimization (20% Lambda savings at Congrify), balancing speed with long-term maintainability.
-

Work Experience

InstruxMusic (Remote, USA) — Tech Lead & Business Partner. *Nov 2024 – Present*

- **Own end-to-end technical strategy** for an ed-tech platform — architecture, stack choices, hiring priorities, and alignment with business scaling and pricing models.
- Led a solo-to-small-team delivery of a production platform in under 3 months: scheduling, video lessons, chat, Stripe billing, and brand builder — setting the engineering bar and velocity for the company.
- Make build-vs-buy calls (custom WebRTC vs. off-the-shelf, Postmark vs. alternatives) that cut bloat and kept the team moving fast without sacrificing reliability.
- Partner directly with founders on product vision, roadmap trade-offs, and go-to-market timing.

[View Recommendations](#)

Congrify (Remote, Germany/Italy) — Team Lead, Senior Software Engineer. *Oct 2023 – Oct 2024*

- **Directed technical strategy** for payment intelligence infrastructure — observability architecture, data platform modernization, and frontend redesign.
- Built a monitoring system (Grafana, CloudWatch) that became the team's primary tool for detecting transaction anomalies and resolving production bottlenecks.
- Led legacy microservice modernization and OLAP migration (ClickHouse, Snowflake), improving concurrency and stability under load.
- Drove 20% AWS Lambda cost reduction through workflow optimization — balancing engineering effort against cloud spend with measurable ROI.
- Spearheaded React frontend redesign; improved caching, error handling, and UX across the product surface.

FxPro (On-site, Limassol, Cyprus) — Senior Software Engineer, De Facto Tech Lead. *Nov 2022 – Oct 2023*

- Owned reliability and operational standards across **60+ microservices** (Java, Node.js) — 20% reliability improvement, 15% downtime reduction.
- Led authentication platform initiative (Azure AD) and global payment config migration spanning 50+ countries — coordinating across teams and time zones.
- Established CI/CD best practices (GitLab, Artifactory), cutting deployment cycles 25%; created tutorials and manuals for 40+ services to raise team autonomy.
- Rolled out observability stack (New Relic, Graylog, Grafana) and incident-response workflows across 25+ services.

[View Recommendations](#)

Cognitran (On-site, Krakow, Poland) — Senior Software Engineer. *Mar 2021 – Oct 2022*

- Delivered mission-critical diagnostic software for Ford and Jaguar; documented 10+ AWS services and owned deployment/scaling decisions for enterprise clients.

Huawei (On-site, Moscow, Russia) — Senior Software Engineer. *Jan 2020 – Mar 2021*

- Established CI/CD standards and best practices across 50+ Java projects; collaborated with global open-source teams on shared libraries and DevOps tooling.

Grid Dynamics — Intern to Senior Software Engineer. *Dec 2015 – Jan 2019*

- Progressed from Intern to Senior in four years; led microservice development for Raymond James and delivered R&D tooling for Google and Home Depot — early leadership on client-facing delivery.

Founder & Side Projects:

[Unison](#) — CTO/Founder since 2019; led platform architecture, team direction, and long-term technical roadmap for a music-tech product.

Talks:

[EHTML 3 Demo \(2026\)](#), [Declarative Unit Testing in Node.js \(2020\)](#), [Declarative Node \(2019\)](#).

Certifications:

[Oracle Certified Associate Java SE 8 Programmer](#)

Education

Applied Mathematics and Computer Science: *Saratov State University, 2012 - 2016*

[Bachelor's Thesis: Cost Minimization of Energy on the Control of Satellite's Angular Motion \(in Russian\)](#).
