Senior Full-Stack Software Engineer and Technical Consultant with 10 years

building low-latency, scalable platforms from the ground up. Tech lead at [InstruxMusic](#); recent banking and payment infrastructure work at Gemba. Deep experience in fintech (banking, payments, trading), workflow automation, and cloud-native systems — plus custom framework development and rapid MVP delivery. **Oracle Certified Java SE 8 Programmer.** Author of [Unison](#), [nodes.js](#), and [EHTML](#).

Skills

- **System Architecture:** Distributed Systems, Microservices, Event-Driven Architecture (EDA), Multi-tenant SaaS, High-Load MVPs, System Design, Scalability, High Availability & Reliability Engineering.
 - **Backend Ecosystem:** Node.js (Express, Fastify, NestJS), JavaScript/TypeScript, Java (Spring Boot), PHP, Python (FastAPI), NX Monorepos, RESTful APIs, GraphQL, Serverless Architecture.
 - **High-Performance UI/UX:** Web Components, EHTML (Founder), React, Next.js, React Server Components (RSC), React Context, React Query, Tailwind CSS, Material UI, Zustand, Angular, Real-time SVG/Canvas Rendering, Shadow DOM, Micro-frontends, HTML5/CSS3, Vite, Esbuild.
 - **Data Engineering & Storage:** PostgreSQL, MySQL, MariaDB, Redis (Caching, Pub/Sub), ClickHouse (OLAP), Snowflake, Supabase, Drizzle ORM, DynamoDB, Prisma, Apache Kafka, RabbitMQ, MongoDB, Elasticsearch, Database Optimization.
 - **Cloud Platforms & DevOps (IaC):** AWS (EC2, ECS, S3, RDS, Lambda, DynamoDB, CloudWatch), GCP (Cloud Run, App Engine, BigQuery, VPC), Azure, DigitalOcean, Docker, Kubernetes (K8s), Terraform, GitHub Actions, GitLab CI/CD, Infrastructure as Code (IaC).
 - **Observability & Telemetry:** OpenTelemetry, Prometheus, Grafana, New Relic, Graylog, Datadog, Distributed Tracing, Log Aggregation, Full-Stack Monitoring.
 - **Protocols & Integrations:** Marble (Banking/Payments), WebRTC (Xirsys), WebSockets, Stripe API (Payment Infrastructure), Postmark (Email Delivery), Azure AD (OAuth2/OIDC), Secure Identity Management, Chat Bots.
 - **Testing & Quality Assurance:** Unit testing (JUnit 5, Jest, Vitest, pytest, PHPUnit), integration & API testing (Postman, Newman, Supertest, REST Assured), E2E testing (Playwright, Cypress), mocking (Mockito, Sinon, Jest mocks), TDD/BDD, contract testing, Testcontainers, coverage & reporting (Allure, Istanbul), CI test gates, load/performance testing.
 - **AI Integration & Tools:** LLM Middleware, AI Developer Tools (Claude Code, Codex, Cursor IDE, GitHub Copilot, Gemini), n8n.
-

Work Experience

InstruxMusic (Remote, USA) — Senior Full-Stack Developer, Tech Lead. *Jul 2025 – Present*

- Architected and accelerated the launch of a high-load ed-tech ecosystem, delivering a production-ready MVP in under 3 months using a streamlined stack of Node.js, PostgreSQL, Docker, and DigitalOcean.
- Engineered a scalable multi-tenant scheduling engine and automated invoicing system, integrating Stripe Payments to establish seamless transactional workflows and eliminate manual billing overhead.
- Developed a proprietary, low-latency video conferencing solution from scratch using vanilla Web Components and Xirsys (STUN/TURN), bypassing heavy third-party framework dependencies to achieve highly efficient real-time streaming, chat, and data channel communication.
- Designed high-deliverability notification pipelines by implementing Postmark, significantly cutting down user communication friction through automated transactional workflows.
- Drive technical strategy and product vision in alignment with business scaling and pricing frameworks, managing execution speed while maintaining a high-performance, low-bloat architecture.

[View Recommendations](#)

Gemba (Remote, Tbilisi) — Senior Software Engineer. *Nov 2024 – Jun 2025*

- Built and maintained payment services for internal and external banking operations, ensuring secure, reliable transaction processing through **Marble** and related platforms.
- Designed workflow automations with **n8n** and integrated chat-based support systems to streamline operations and improve customer communication.
- Developed **CI/CD pipelines** that accelerated deployments and strengthened production stability through automated testing, monitoring, and performance optimization.
- Partnered with cross-functional teams to align payment infrastructure with business goals and operational requirements.
- Diagnosed and resolved production incidents across payment and automation systems, restoring service quickly and hardening reliability.

Congrify (Remote, Tbilisi) — Senior Software Engineer, Tech Lead. *Feb 2024 – Oct 2024*

- Directed technical strategy and system observability by architecting a specialized monitoring system using Grafana and AWS CloudWatch, enabling real-time detection of payment transaction anomalies and resolving critical infrastructure bottlenecks.

- Reduced AWS Lambda operational costs by 20% through targeted workflow optimizations, memory tuning, and improved data-processing logic across serverless environments handling Java, Python, and Node.js runtimes.
- Spearheaded the modernization of legacy microservices, dramatically improving concurrency patterns, query execution, and high-load stability by migrating complex datasets to ClickHouse (OLAP) and Snowflake.
- Enhanced large-scale data ingestion and asynchronous messaging pipelines by leveraging AWS SQS and robust Pub/Sub architectures, ensuring zero-loss system reliability and high availability under heavy transactional surges.
- Led an end-to-end frontend redesign and streamlined communication systems by integrating AWS SES for transactional mailings and optimizing the React ecosystem with advanced caching and sophisticated state management.

FxPro (On-site, Limassol, Cyprus) — Senior Software Engineer. *Nov 2022 – Oct 2023*

- Orchestrated infrastructure for 60+ microservices using Node.js (NestJS) and Java, delivering a 20% improvement in system reliability and a 15% reduction in operational downtime.
- Created a centralized Authentication Service with Azure Active Directory integration and successfully migrated payment configurations for 20+ global systems across 50+ countries.
- Optimized data consistency and performance across distributed services by leveraging Redis for caching and PostgreSQL for mission-critical financial data.
- Streamlined CI/CD pipelines using Artifactory in GitLab, reducing deployment cycles by 25% and ensuring high-availability across global environments.
- Implemented full-stack observability across 25+ services using New Relic, Graylog, and Grafana, enabling real-time bottleneck identification and rapid incident response.

[View Recommendations](#)

Cognitran (On-site, Krakow, Poland) — Senior Software Engineer. *Sep 2021 – Oct 2022*

- Implemented offline mode for over half of diagnostic tool features and introduced performance improvements that boosted system efficiency by 15% for Ford and Jaguar automotive diagnostics.
- Deployed, managed, and scaled AWS infrastructure — EC2, S3, RDS, DynamoDB, Lambda, and VPC — with custom monitoring on CloudWatch and CloudTrail.
- Managed AWS integrations using Terraform and documented 10+ services for team onboarding and operational support.

Alten (On-site, Krakow, Poland) — Senior Software Engineer. *Mar 2021 – Aug 2021*

- Designed integration solutions and delivered new software on Google Cloud, Kubernetes, and container-based infrastructure.
- Owned end-to-end delivery of product increments within a Scrum team, collaborating with Product Owners, SMEs, and IT stakeholders.
- Supported Business UAT, testing, and technical documentation with a focus on code quality and thorough reviews.

Huawei (On-site, Moscow, Russia) — Senior Software Engineer. *Jan 2020 – Mar 2021*

- Built automation tools to streamline API migration and bug fixing across 50+ Java codebases in global open-source teams.
- Contributed to key libraries including Broken XML and Rewrite Java Definitions; established CI/CD pipelines and best practices across numerous projects.
- Improved DevOps tooling and internal developer standards, including alternatives to Artifactory for artifact management.

US Mobile (Remote, USA) — Senior Software Engineer. *Feb 2019 – Jan 2020*

- Helped design technical solutions and created a roadmap for migrating infrastructure to Google Cloud Platform (GCP).
- Successfully oversaw the implementation of this replatforming, ensuring a smooth and efficient transition.
- Spearheaded the full automation of report processing from third-party sources, utilizing GCP services to significantly improve data processing and operational efficiency.

Grid Dynamics — Intern to Senior Software Engineer. *Dec 2015 – Jan 2019*

- Progressed from Intern to Senior Engineer; delivered internal tooling and microservices for Google, Raymond James, and Home Depot.
- Built a programmer performance evaluation tool for Google in Wroclaw; led microservices for large-scale client data at Raymond James.
- Contributed to Home Depot's support tool in Saratov, working closely with client management to deliver key features.
