Senior Full-Stack Software Engineer and MVP Builder who ships production-ready products in weeks, not quarters. **10 years** owning the full stack solo or with small teams — backend, frontend, databases, payments, real-time features, and cloud deployment. Repeated pattern: zero-to-one multi-tenant SaaS with scheduling, Stripe billing, video/chat, and admin dashboards. Creator of [nodes.js](#) and [EHTML](#). Founder of [Unison](#); tech leader at [InstruxMusic](#).

Work Experience

InstruxMusic (Remote, USA) — Solo MVP Builder → Tech Lead. Nov 2024 — Present

- **Shipped production MVP in under 3 months** as primary builder: multi-tenant scheduling, Stripe billing, automated invoicing, video lesson rooms, chat, and brand builder — Node.js, PostgreSQL, Docker, DigitalOcean.
- Built proprietary low-latency video conferencing from scratch (Web Components + Xirsys STUN/TURN) instead of paying for heavy SDKs — saved months of integration and kept the stack lean.
- Used custom backend (nodes.js patterns) and frontend (EHTML/Web Components) to move faster than a standard React+Nest boilerplate team.
- Wired Postmark notification pipelines on day one so the product felt complete to early users — not a hacky beta.
- Involved in pricing, packaging, and roadmap — MVP decisions driven by what sells, not what's technically interesting.
