

Guseyn Ismayylov

Senior Cloud Infrastructure Engineer · Technical Leader

Legal name: Gusein Ismaiyllov · Remote · Georgia 🇧🇪

guseyn@guseyn.com [@guseyn](https://t.me/guseyn) guseyn.com

[GitHub](#) · [StackOverflow](#) · [LinkedIn](#) · [Instagram](#)

Senior engineer with **10 years** in enterprise cloud infrastructure, identity integration, and hybrid-style transformation — operating **60+ microservices** in global fintech, leading a full **GCP replatforming**, and shipping production systems on **AWS** at scale. Built a centralized authentication service integrated with **Microsoft Entra ID / Azure AD** (OAuth2/OIDC) for 20+ payment systems across 50+ countries. Strong in **Terraform, Kubernetes, Docker**, CI/CD, observability, and cost-aware architecture — comfortable explaining trade-offs to stakeholders and working across teams. Primary production depth is AWS and GCP; Azure experience is grounded in real enterprise identity and integration work. **Oracle Certified Java SE 8 Programmer**. Author of [nodes.js](#) (cluster-based Node.js backend framework).

SKILLS

Cloud architecture & transformation — Multi-cloud and hybrid migration patterns, microservices at scale, high availability, reliability engineering, legacy modernization, cost optimization, stakeholder-facing technical design.

Microsoft identity (Entra ID / Azure AD) — Production integration of centralized authentication services with Azure Active Directory; OAuth2/OIDC; secure identity management across distributed enterprise systems.

AWS (primary production depth) — EC2, ECS, Lambda, S3, RDS, DynamoDB, SQS, SES, CloudWatch; serverless optimization; event-driven and messaging pipelines.

GCP — Cloud Run, App Engine, BigQuery, VPC; migration roadmaps, replatforming execution, workload automation.

Azure (working knowledge) — Azure AD / Entra ID integration in production; familiarity with Azure resource and hybrid identity concepts from enterprise fintech work.

DevOps & IaC — Terraform, Docker, Kubernetes, GitHub Actions, GitLab CI/CD, Artifactory; cluster-based deployment (nodes.js); DigitalOcean and VPS production ops.

Observability & security — Grafana, Prometheus, New Relic, Graylog, Datadog, OpenTelemetry, AWS CloudWatch, ELK/Elastic Stack; incident response and production monitoring.

Data & messaging — PostgreSQL, Redis, Kafka, ClickHouse, Snowflake, DynamoDB; caching, pub/sub, OLAP analytics tiers.

Application stack (supporting) — Node.js, Java/Spring Boot, TypeScript; REST/OpenAPI; enough depth to architect end-to-end systems, not just infra slides.

WORK EXPERIENCE

InstruxMusic — Senior Full-Stack Developer, Tech Lead

Nov 2024 – Present · Remote · USA

- Own production infrastructure for a multi-tenant SaaS platform — PostgreSQL, Docker, DigitalOcean, CI via GitHub Actions — delivering a production-ready MVP in under 3 months.
- Designed deployment and runtime architecture for a complex ed-tech ecosystem: scheduling, billing, notifications (Postmark), and Stripe payment flows with predictable hosting costs.
- Built a proprietary WebRTC video stack (STUN/TURN via Xirsys) without heavy third-party platform dependencies, reducing per-minute infrastructure and licensing overhead.
- Drive technical strategy with the business on scaling, reliability, and pricing — balancing speed of delivery with operability.

Congrify — Senior Full-Stack Engineer, Tech Lead

Oct 2023 – Oct 2024 · Remote · Germany/Italy

- Architected observability for payment infrastructure using Grafana and AWS CloudWatch — real-time anomaly detection and faster resolution of production bottlenecks.
- Reduced AWS Lambda costs by 20% through memory tuning, workflow optimization, and improved serverless data-processing logic.
- Modernized legacy microservices and data tiers — ClickHouse (OLAP), Snowflake, DynamoDB, S3 — improving stability under heavy transactional load.
- Built large-scale ingestion and async messaging on AWS SQS and pub/sub patterns for high availability during payment surges.
- Integrated AWS SES for transactional email and improved CI/CD reliability across the AWS estate.

FxPro — Senior Full-Stack Engineer

Nov 2022 – Oct 2023 · Limassol, Cyprus

- Built a centralized Authentication Service integrated with **Azure Active Directory** (OAuth2/OIDC), unifying identity for enterprise payment systems across 50+ countries.
- Migrated payment configuration for 20+ global systems — coordinating rollout, compatibility, and operational safety across distributed environments.
- Orchestrated infrastructure for 60+ microservices — 20% reliability improvement and 15% reduction in operational downtime.

- Streamlined CI/CD with GitLab and Artifactory, cutting deployment cycles by 25% across global production environments.
- Rolled out observability (New Relic, Graylog, Grafana) across 25+ services for incident response and capacity planning.

[View Recommendations](#)

Cognitran — Senior Software Engineer

Mar 2021 – Oct 2022 · Krakow, Poland

Delivered mission-critical, offline-first automotive diagnostic software and automated documentation pipelines for enterprise clients including Ford and Jaguar — systems with strict reliability and deployment constraints typical of hybrid enterprise environments.

Huawei — Senior Software Engineer

Jan 2020 – Mar 2021 · Moscow, Russia

Designed high-performance cloud infrastructure components, optimized internal developer tooling, and built high-throughput data parsers for large-scale internal platforms.

US Mobile — Senior Software Engineer

Feb 2019 – Jan 2020 · Remote · USA

- Designed the technical approach and migration roadmap for moving production infrastructure to **Google Cloud Platform**.
- Led replatforming execution — minimizing downtime and validating workloads on GCP services post-migration.
- Automated third-party report ingestion on GCP, improving data processing throughput and operational efficiency.

Grid Dynamics — Intern to Senior Software Engineer

Dec 2015 – Jan 2019

Progressed from Intern to Senior Engineer, delivering cloud-native R&D internal tooling for enterprise clients including Google, Raymond James, and Home Depot.

CERTIFICATIONS

Oracle Certified Associate, Java SE 8 Programmer

OPEN SOURCE

Nodes.js — Node.js backend framework with Cluster API (HTTP/2, multi-core scaling, graceful restarts), EHTML, e-ui

EDUCATION

Applied Mathematics and Computer Science — *Saratov State University, 2012 - 2016*
Bachelor's Thesis (PDF)
