[GitHub](#) / [StackOverflow](#) / [LinkedIn](#) / [Instagram](#)

Senior Fullstack Software Engineer and **Technical Leader** with **10 years** of experience building low-latency, scalable platforms from the ground up. Specialized in custom framework development, performance optimization, and mission-critical payment infrastructure. Author of [Unison](#), [nodes.js](#) (High-performance Backend Framework) and [EHTML](#) (Declarative Frontend Framework).

Skills

- **Engineering Architecture:** Distributed Systems, Microservices, Event-Driven Architecture (EDA), Multi-tenant SaaS, High-Performance MVPs, System Design, Scalability & Reliability Engineering.
 - **Backend Core Stack:** Node.js (Express, Fastify, NestJS), JavaScript/TypeScript, Java (Spring Boot), NX Monorepos, Bun, RESTful & GraphQL APIs, Serverless (AWS Lambda).
 - **High-Performance UI/UX:** Web Components, EHTML (Founder), React/Next.js, Tailwind, SVG/Canvas Rendering, Shadow DOM, Micro-frontends, CSS3/HTML5.
 - **Data & Analytics:** PostgreSQL, Redis (Caching & Pub/Sub), ClickHouse (OLAP), Snowflake, Supabase, Drizzle, Prisma, Kafka, RabbitMQ, MongoDB, MariaDB, Elasticsearch.
 - **Cloud & DevOps (IaC):** AWS (EC2, ECS, S3, RDS), GCP, Azure, DigitalOcean, Docker, Kubernetes (K8s), Terraform, GitHub Actions, CI/CD Pipeline Automation.
 - **Systems & Communication:** WebRTC (Xirsys), WebSockets, OpenTelemetry, New Relic, Grafana, GrayLog, Stripe (Payments), Postmark, Azure AD (OAuth2/OIDC).
-

Work Experience

InstruxMusic (Remote, USA) — Tech Leader. *Nov 2024 – Present*

- Architected and led a comprehensive ed-tech ecosystem, delivering a production-ready MVP in just 3 months using Node.js and PostgreSQL on DigitalOcean using Docker.
- Designed and implemented an advanced scheduling system and automated invoicing with full Stripe payment integration.
- Developed a custom video conferencing solution from scratch, utilizing WebComponents and Xirsys (TURN/STUN) for real-time streaming, chat, and file sharing.

- Optimized user communication by integrating Postmark for high-deliverability transactional emails and automated notifications.
- Actively steer product roadmap, pricing strategies, and business scaling, balancing technical debt with rapid feature delivery.

[View Recommendations](#)

Congrify (Remote, Germany/Italy) — Team Lead & Full Stack Senior Software Engineer. *Oct 2023 – Oct 2024*

- Directed technical strategy and resolved critical infrastructure bottlenecks by architecting a specialized monitoring system using Grafana to detect real-time transaction anomalies.
- Reduced AWS Lambda operational costs by 20% through targeted workflow optimizations and improved data processing logic across the AWS ecosystem.
- Spearheaded the modernization of legacy microservices, enhancing concurrency patterns and stability by utilizing high-performance data stores like ClickHouse and Snowflake.
- Optimized large-scale data ingestion and asynchronous messaging by leveraging Pub/Sub architectures to ensure system reliability under heavy loads.
- Led a comprehensive frontend redesign, significantly improving application performance and UX within the React ecosystem through advanced caching and sophisticated state management strategies.

FxPro (On-site, Limassol, Cyprus) — Senior Software Engineer. *Nov 2022 – Oct 2023*

- Orchestrated infrastructure for 60+ microservices using Node.js (NestJS) and Java, delivering a 20% improvement in system reliability and a 15% reduction in operational downtime.
- Engineered a centralized Authentication Service with Azure Active Directory integration and successfully migrated payment configurations for 20+ global systems across 50+ countries.
- Optimized data consistency and performance across distributed services by leveraging Redis for caching and PostgreSQL for mission-critical financial data.
- Streamlined CI/CD pipelines using Artifactory in GitLab, reducing deployment cycles by 25% and ensuring high-availability across global environments.
- Implemented full-stack observability across 25+ services using New Relic, Graylog, and Grafana, enabling real-time bottleneck identification and rapid incident response.

[View Recommendations](#)

Cognitran (On-site, Krakow, Poland) — Senior Software Engineer. *Mar 2021 – Oct 2022*

- Developed mission-critical automotive software solutions for brands like Ford and Jaguar and automated technical documentation pipelines.
- Crafted the design and developed offline mode for automotive diagnostic tools.

Huawei (On-site, Moscow, Russia) — Senior Software Engineer. *Jan 2020 – Mar 2021*

- Engineered high-performance cloud infrastructure components and optimized internal developer tooling.
- Crafted advanced parsers for different formats like XML.
- Collaborated with remote open source team to enhance research and development initiatives

USMobile (Remote) — Senior Software Engineer. *Feb 2019 – Jan 2020*

- Scaled e-commerce and telecommunication platforms, implementing secure billing and user management features.
- Migrated solution from legacy deployment to GCP

Grid Dynamics — Intern to Senior Software Engineer. *Dec 2015 – Jan 2019*

- Delivered high-impact solutions for clients including **Google, Raymond James, and Home Depot**, specializing in R&D and Cloud-native internal tooling.

Open Source Projects:

[EHTML](#), [Nodes.js](#), [Test executor](#), [Broken XML](#), [Rewrite Java Definitions](#), [Mathematics of Neural Network](#)

Talks:

[EHTML 3 Demo \(2026\)](#), [EHTML: Demo \(6 Dec 2023\)](#), [Declarative Unit Testing in Node.js \(in Russian, 1 Mar 2020\)](#), [Declarative Node \(in Russian, 8 Feb 2019\)](#), [EHTML: Simple Blog App \(1 Dec 2019\)](#)

Certifications:

[Oracle Certified Associate Java SE 8 Programmer](#)

Education

Applied Mathematics and Computer Science: *Saratov State University, 2012 - 2016*

[Bachelor's Thesis: Cost Minimization of Energy on the Control of Satellite's Angular Motion \(in Russian\).](#)
