Senior Software Engineer | Technical Leader with **10 years** of experience building low-latency, scalable platforms from the ground up. Specialized in custom framework development, performance optimization, and mission-critical payment infrastructure. I created [Unison](#), [nodes.js](#) (High-performance Backend Framework) and [EHTML](#) (Declarative Frontend Framework).

Core Stack: Node.js (Express, Fastify, NestJS), JavaScript/TypeScript, Java (Spring Boot), NX Monorepos.

Frontend & UI/UX: Web Components, EHTML, React/Next.js, SVG, CSS, Performance-first UI.

Data & Performance: PostgreSQL, Redis, MongoDB, MariaDB, Clickhouse, Snowflake, ORM.

Cloud & DevOps: AWS, GCP, Azure, Digital Ocean, Docker, Kubernetes, GitHub Actions, CI/CD.

Observability & Systems: New Relic, OpenTelemetry, Grafana, GrayLog, WebRTC, WebSockets, Message-Driven Architecture, Stripe.

Work Experience

Independent Contractor | *Nov 2022 - Present*

InstruxMusic (Remote) — CTO & Business Partner | *Nov 2024 – Present*

Architected and deployed a comprehensive ed-tech ecosystem as a solo developer, delivering a production-ready MVP in just **3 months**. The platform features an advanced scheduling system, crafted from scratch video conferencing with real-time chat and file sharing, automated invoicing system, and payment intergration. Leveraged custom-built, low-latency frameworks to bypass standard library bloat and accelerate development cycles. Actively steer product roadmap, pricing strategies, and business scaling. Currently overseeing platform maintenance and long-term technical stability.

[View Recommendations](#)

Congrify (Remote) — Team Lead & Full Stack Senior Software Engineer | *Oct 2023 – Oct 2024*

Directed technical strategy and resolved critical AWS infrastructure bottlenecks while architecting a specialized monitoring system to detect real-time transaction anomalies. **Reduced AWS Lambda operational costs by 20%** through targeted

workflow optimizations and improved data processing logic. Spearheaded the modernization of legacy microservices by enhancing concurrency patterns and stability. Lead a comprehensive frontend redesign, significantly improving application performance, UX, and error-handling resilience within the React ecosystem through advanced caching and state management strategies.

FxPro (Limassol, Cyprus) — Senior Software Engineer | *Nov 2022 – Oct 2023*

Orchestrated infrastructure for **60+ microservices**, delivering a **20% improvement in system reliability** and a 15% reduction in operational downtime. Engineered a centralized Authentication Service with **Azure Active Directory** integration and successfully migrated payment configurations for 20+ global systems across 50+ countries. Optimized CI/CD pipelines to **reduce deployment cycles by 25%** and implemented **New Relic** observability across 25 services to identify and resolve performance bottlenecks. Standardized internal knowledge sharing by authoring technical documentation and manuals for 40+ core services to accelerate team onboarding and developer productivity.

[View Recommendations](#)

Cognitran (Krakow, Poland) — Senior Software Engineer | *Sep 2021 – Oct 2022*

Developed mission-critical automotive software solutions and automated technical documentation pipelines.

Alten (Krakow, Poland) — Senior Software Engineer | *Mar 2021 – Aug 2021*

Consulted on large-scale enterprise systems, focusing on backend performance and stability.

Huawei (Moscow, Russia) — Senior Software Engineer | *Jan 2020 – Mar 2021*

Engineered high-performance cloud infrastructure components and optimized internal developer tooling.

USMobile (Remote) — Senior Software Engineer | *Feb 2019 – Jan 2020*

Scaled e-commerce and telecommunication platforms, implementing secure billing and user management features.

Grid Dynamics — Intern to Senior Software Engineer | *Dec 2015 – Jan 2019*

Delivered high-impact solutions for clients including **Google, Raymond James, and Home Depot**, specializing in R&D and Cloud-native internal tooling.

Side project:

Unison (unisonofficial.com): 2019 Dec. - Present. CTO. As CTO and Founder of Unison, I led the development of a long-lasting, technically robust platform that transforms text into dynamic music notation. Leveraging a solid tech stack—including Node.js, MongoDB, HTML, SVG,

Markdown, EHTML — I combined hands-on engineering with strategic direction to build a maintainable, scalable solution at the intersection of music and technology.

Open Source Projects:

[EHTML](#), [Nodes.js](#), [Test executor](#), [Broken XML](#), [Rewrite Java Definitions](#), [Mathematics of Neural Network](#)

Talks:

[EHTML 3 Demo \(2026\)](#), [EHTML: Demo \(6 Dec 2023\)](#), [Declarative Unit Testing in Node.js \(in Russian, 1 Mar 2020\)](#), [Declarative Node \(in Russian, 8 Feb 2019\)](#), [EHTML: Simple Blog App \(1 Dec 2019\)](#).

Certifications:

[Oracle Certified Associate Java SE 8 Programmer](#)

Education: Applied Mathematics and Computer Science: *Saratov State University*, 2012 - 2016

[Bachelor's Thesis: Cost Minimization of Energy on the Control of Satellite's Angular Motion \(in Russian\)](#).

Rest of Life:

I play guitar and ukulele, watch good movies, read useful books, learn chess, do sport activities (football, running), and travel a bit. More about me you can find [here](#).
